When it comes to offroading, having reliable gear is essential for safety, performance, and peace of mind. One of the most critical components in your recovery toolkit is the Jowl Recovery Split Shackle 7/8. Engineered for durability, strength, and functionality, this premium recovery shackle delivers superior performance whether you're navigating tough trails or performing vehicle recoveries. The [JOWL Recovery Split Shackle 7/8" Blue Balls](#) is designed to handle demanding conditions and provide the reliability you need when it matters most.

Product Information

The Moose Knuckle Offroad JOWL Recovery Split Shackle is designed to handle extreme loads with confidence. Crafted from high-quality forged steel, this 7/8" split shackle features signature "Blue Balls"—a distinctive design element that not only enhances grip but also provides easy handling in rugged conditions. This recovery shackle is rated to handle heavy-duty towing and winching tasks, making it ideal for offroaders who demand reliability during vehicle recovery operations. Its split design ensures a secure connection while allowing for quick attachment and detachment, saving time in critical moments.

Key product details include:

- **Material:** Forged steel for maximum strength and durability
- **Size:** 7/8" pin diameter, suitable for heavy recovery tasks
- **Finish:** Corrosion-resistant blue powder coating for durability in harsh environments
- **Design:** Split shackle with ergonomic blue ball ends for easy handling
- **Load Rating:** Exceeds industry standards for offroad recovery shackles

Why Choose the JOWL Recovery Split Shackle?

Selecting the right recovery shackle can mean the difference between a smooth recovery and a potential safety hazard. Offroad has engineered the JOWL Recovery Split Shackle with features that set it apart from generic shackles:

Unmatched Strength and Durability

Constructed from forged steel, this recovery shackle provides superior tensile strength to withstand the rigors of offroad recovery. It won't bend or break under pressure, ensuring dependable performance every time.

Easy Handling with Unique "Blue Balls"

The ergonomically designed blue balls at the ends of the shackle pin improve grip, even when wearing gloves or working in muddy, wet conditions. This thoughtful design accelerates the recovery process by making the shackle easier to handle.

[Corrosion](#) Resistance for Longevity

The blue powder coating protects the shackle from rust and corrosion, extending its lifespan and maintaining reliability even after repeated exposure to dirt, water, and harsh elements.

Quick and Secure Attachment

The split shackle design allows for fast attachment and detachment without compromising safety, enabling you to react quickly during urgent recovery scenarios.

What You Get with the JOWL Recovery Split Shackle

When you purchase the JOWL Recovery Split Shackle 7/8" Blue Balls, you receive:

- 1 x JOWL Recovery Split Shackle (7/8" Blue Balls)
No additional hardware is required; the shackle comes ready for immediate use.
Each component is carefully inspected for quality before shipping, ensuring you receive a product that meets the highest standards.

Key Feature and Benefits Explained

The JOWL Recovery Split Shackle is an essential tool for anyone involved in offroading, vehicle recovery, or towing. Here's why it should be part of your gear:

Off Road Enthusiasts and Adventurers

If you regularly explore rough terrain, deep mud, or rocky trails, you need recovery shackles you can trust. This shackle offers the strength to handle winching, pulling, and towing your vehicle or others without fail.

Professional Recovery Operators and Tow Truck Drivers

For professionals who depend on recovery equipment every day, the shackle offers safety, efficiency, and durability to handle even the most demanding jobs.

Emergency Responders and Search & Rescue Teams

Quick, reliable recovery shackles are crucial for emergency scenarios where time and safety are critical. The ergonomic design and secure fit of the JOWL shackle enhance operational effectiveness.

Fleet Operators and Commercial Vehicle Owners

Vehicles used in construction, agriculture, or transportation often require dependable recovery gear. This shackle ensures minimal downtime by facilitating safe and quick recoveries.

Key Features and Benefits

- **Heavy-Duty Strength:** Capable of handling high loads and rigorous use without deformation.
- **Enhanced Grip:** The blue balls provide superior handling, even in adverse conditions.
- **Corrosion Resistance:** Maintains integrity and appearance despite exposure to elements.
- **Fast Operation:** Split design enables quick hooking and unhooking, saving valuable time.
- **Safety Assured:** Exceeds industry standards, reducing risk during vehicle recoveries.
